

### GRP WALKWAY

Glass Reinforced Plastic (GRP) Walkways ensure a safe & non-slip access when working at height.

The GRP walkway is robust and requires minimal maintenance. It is non-conductive and non-magnetic and also extremely resistant to most industrial chemicals.

The walkway is designed for occasional maintenance work. Should more regular use be required our team can suggest alternatives.

#### TECHNICAL INFORMATION

|                       |                          |
|-----------------------|--------------------------|
| SYSTEM TYPE           | WALKWAY                  |
| FUNCTION              | HEIGHT SAFETY            |
| MAXIMUM WIDTH         | 810 MM                   |
| MAXIMUM LOAD CAPACITY | 150KG/M <sup>2</sup>     |
| MAXIMUM INCLINE       | 45°                      |
| FIXING TYPE           | PERMANENT                |
| INSPECTION PERIOD     | 12 MONTHS                |
